

## What's New

What a month! We have made a lot of changes and added new exciting features to our platform recently, read on to find out more...

### INTERNATIONAL TRAVEL

Lime DJ has been spreading its wings around the globe since its launch in August last year. This month has seen a large influx of new users from around the globe seeing our platform now being used regularly in 33 countries.

Welcome onboard everyone and thanks for joining Lime DJ!

## Interface Redesign & Shows Page

The user interface has had a big makeover this month and we are very happy with how it has turned out.

The other big change is the Shows page. Now there are separate pages for your active shows, previous shows and to create a new show.

You can now have multiple shows running simultaneously and create shows in advance using a Unique URL / QR Code. Creating shows using a Unique URL means that you can give out the link to receive requests for the show prior to the event.

This way you can keep your main URL for regular gigs and create a unique URL for everything else.

### Song Voting

A new option has appeared on the show settings page to enable Song Voting. When enabled, a thumb will appear next to songs on the public song queue.

You will be able to see the number of votes each song has received on the requests page for the show.

### Profile Slideout

Your audience can now click at the top right of your public pages and a slideout will appear with your bio and social links.

Make sure you have all your details filled in on the Edit Profile page as this is a great way of promoting your business and generating new leads at gigs!

### Photo Albums

3 new buttons attached to each of your photo albums... view photo album, view slideshow and download.

Hitting download will download all photos in the album as a zip file, perfect for giving to your client!

### Song Manager

If you have a PRO account and have your song catalog hosted with us you can now self manage your catalog on the new Song Manager page.

Here you can edit existing song details, delete songs and add new songs to your catalog.

As always, if you have any features you would like to see added or have any suggestions please get in touch via the contact form on the Support page.

Happy gigging!

James and the team
